

Black Forest Container Systems

Stainless Steel Tanks for Agricultural Chemicals

Stainless steel packaging solutions for Agricultural Chemicals

- Herbicides
- Fungicides
- Pesticides
- Glyphosates
- Seed Treatment
- Industrial Chemicals

Reusable Stainless Steel Agricultural Chemical containers, tanks and drums:

- Reduce packaging costs
- Eliminate disposal costs and waste
- Reduce maintenance costs
- Improve safety
- Improve efficiency
- Ensure product integrity
- Ensure compliance with EPA guidelines

Black Forest Container Systems is the preferred supplier of stainless steel packaging for the transport, application, processing and storage of agricultural chemicals. Black Forest Container Systems offers closed loop containers, tanks and drums which are ideally suited for reuse and specifically designed to safely dispense agricultural chemical products with pressure. Pressure dispense eliminates the need for costly pumps and other ancillary equipment. The elimination of pumps greatly reduces costs and down time due to maintenance issues. Stainless steel containers are the safest, most economic and reliable method to dispense your agricultural chemicals.

We offer a variety of standard chemical container designs and our custom Systems can be designed for specific material handling applications. Packaging systems include container sizes ranging from 1 gallon (4 liters) to over 528 gallons (2000 liters). Containers may be customized for pressurized dispense, fitted with heating or cooling jackets or lined with Fluoropolymers. Optional container certifications include UN/DOT, CE, ASME, FM, and TuV. Leasing and rental programs and custom package design and consultation are also available.

Black Forest Container Systems

Stainless Steel Tanks for Agricultural Chemicals

Modern stainless steel technology and protection of the environment go hand in hand. Stainless steel combines a wide spectrum of outstanding technical properties in addition to protecting precious natural resources and being completely recyclable. – Commitment to Environment

Black Forest's extensive experience in working with stainless steel provides them with unmatched technical knowledge, quality in welding, formation, and deep drawn product lines. Stainless steel is unmatched and unequalled in protecting your valuable liquid chemical assets. – Commitment to Quality

Black Forest's fully recyclable containers offer a lifetime of use, and a substantial future value. Unlike plastic vessels which have a short life expectancy, cannot safely hold pressure, and are costly to dispose of, stainless steel containers can be used for 20 years or more and can easily be rededicated for new products, or scraped as a raw material asset. – Commitment to Value

BLACK FOREST your partner for stainless steel products for agricultural chemicals.

- Leasing programs available
- Stainless Steel Containers for hazardous and non-hazardous products
- Pressure Vessels for transport, storage and process
- Closed loop Intermediate Bulk Containers
- Containers for viscous products to up 800,000 centipoise
- A variety of filling and dispensing options are available including air pressure, pump, with or without product agitation

115 Gallon
