

## Celebrating 25 Years Serving the Packaging Industry

Black Forest Companies is proud to announce that June 15<sup>th</sup> marks our 25<sup>th</sup> anniversary. We are honored to have reached this significant milestone with the support of our cherished customers, vendors and employees.

Since our inception in 2000, Black Forest has been committed to providing customers with outstanding value and high-quality products and dedicated service.

During these 25 years Black Forest has supplied 100,000+ reusable stainless steel containers into the food, beverage, chemical and pharmaceutical markets replacing single use containers.

We are proud of our continuous commitment to sustainability. Our stainless steel packaging does not break down during the recycling process and can be recycled indefinitely. In practice, stainless steel's high value makes it worth collecting and sorting. As a result, 95% of stainless steel is recycled at the end of its life.

Stainless steel process tanks boast impressive longevity, often lasting for decades with proper care. Well-maintained vessels typically have a life expectancy between 15-30 years and under the right conditions, can last as long as 40-50 years.

We would like to say THANK YOU to our customers and vendors and employees for their loyal support and help in making us the leading distributor and full service provider of stainless steel packaging and material handling equipment that we are today.

Black Forest is honored to have become a trusted name in our industry and to have had the privilege of serving our many customers over the years.
