ETFE Lined UN 31A Bulk IBC's for Black Forest Container Systems, LLC

Greenville, SC, April 2018: Black Forest Container Systems, LLC, is proud to announce the launch their new offering: Teflon Lined UN31A Intermediate Bulk Container. This new Teflon lined UN31A IBC allows for shipping/transport of UN required products. "With this new design we are offering the shipper/filler to use our IBC's very corrosive products not compatible with metal IBC's." said Tom Leftwich Co-Owner of Black Forest Container Systems, "Offering transport solutions for more hazardous products."

Enhancements include:

- ETFE Lined - modified; mechanical toughness and outstanding chemical resistance, service temperatures range from -20°F (-29°C) to 300°F (230°C)
- Fitting Options - Teflon valving, diptubes, special lined 3-piece ball valve.
- Higher Vapor Pressure Product -
Returnable, reusable containers are designed for high vapor pressure products, are capable of maintaining a nitrogen blanket, and are suitable for pressure filling and dispensing of products. Our UN31A bulk IBCs have similar features and benefits to our smaller UN1A1 containers. This allows the shipper/filler to use our cylindrical IBCs filled with higher vapor pressure rated products than standard IBCs.

Laura Schneider – Business Development Manager at BFCS, "Reassuring our customers that their shipments of Hazardous chemicals are being safely and legally transported is our number one priority. Knowing that they are buying a quality product is key."

Black Forest Container Systems, LLC located in Greenville, SC, founded in 2000, is the leading distributor in North America of closed loop custom equipment and multi-trip stainless steel packaging systems. Their product offerings include stainless steel containers, intermediate bulk containers, mini-bulks, totes, ASME pressure vessels, process tanks, storage tanks, flasks, bottles, fermenters, wine equipment and process drums. In addition, Black Forest Resources, LLC the sister company of BFCS, offers a container leasing program. The rental fleet consists of high quality intermediate bulk containers (IBC's), totes, portable tanks, mini-bulks and small volume chemical and general purpose containers for the agriculture, chemical, cosmetic, food, industrial and pharmaceutical industries.
